

1. Download the certificate from Report Archive login page.

2. When prompted to Save or Open, you can simply click on the Open option.

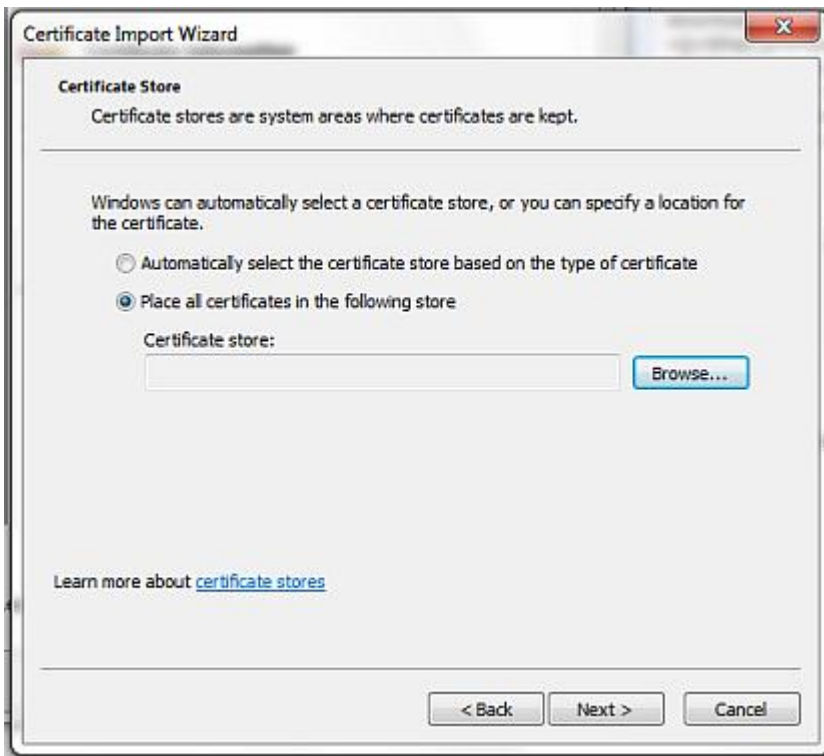

3. Once opened, click on the "Install Certificate..." button.

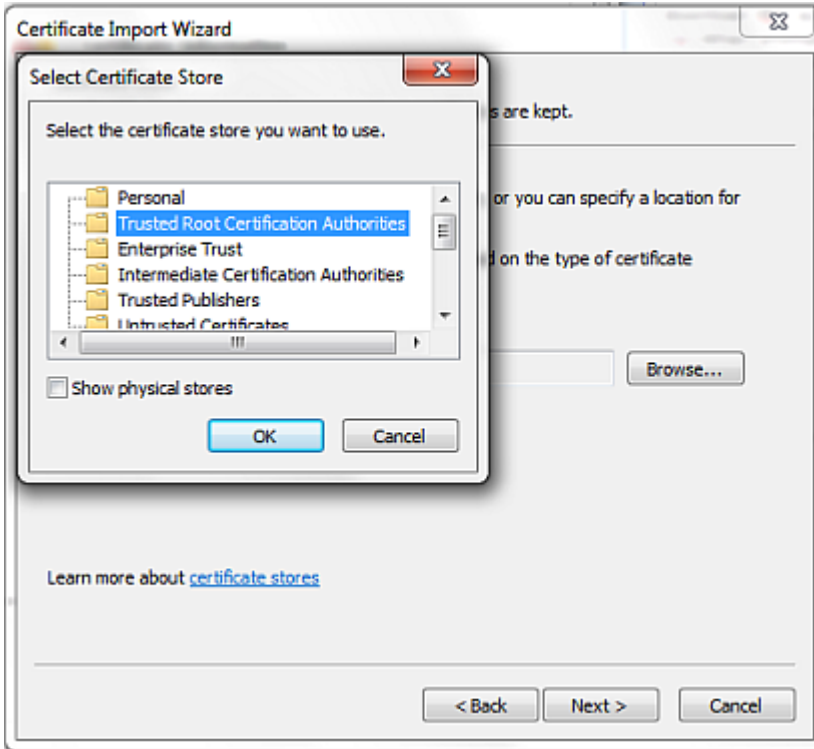

4. Click "Next"

5. Under the Certificate Store window, choose the option "Place all certificates in the following store".

Then, "Browse" for **Trusted Root Certification Authorities**.

Click "OK" and "Next".

6. Click "Finish"

7. A warning window will be prompted. Click "Yes".

That's it! The certificate has been successfully installed for you. No more annoying security warning prompt when you login to PES the next time.

For other browsers, please visit the following urls:

- Firefox 3.5: <http://www.cyberciti.biz/faq/firefox-adding-trusted-ca/>
- IE8: <http://wiki.wmtransfer.com/wiki/show/Installing+root+certificate+in+Internet+Explorer+8>

Generally, the installation procedures should be about the same for the different versions of IE or Firefox.

Have a nice day.
